**IV. Budget Items**

- 4.1 Review Budget (05-06 update)**—only change was two document cameras were ordered with technology/categorical funding. One will go in the 600 and one in the 500 building. The teachers who have them in their classes will be sure they will be used. This will give teachers a chance to try them out and get used to them before purchasing a lot. The

document camera would save money in overhead projector copying. One member wanted to know how robust the cameras are. Apparently the light bulbs are about \$400. The projectors have to be cooled down to be sure the light bulbs don't break. There will be training and directions attached.

**4.2 Budget Update 06-07**—Laurie and Caroline reviewed the budget. No money is currently being spent out of this year's budget because of concern over the future budget since she was told some items would have to be covered by carry over money. We need almost \$24,000 in carry over money for next year. An example would be that noon duty money isn't in next year's budget, even though it's needed and will be covered, but it will have to be out of carry over. Same thing with over 1/2 of copier expense money. If money is reinstated, then it's a problem and we'll be right on the edge. There was a discussion about the cost of the copier. Laurie explained the type of budget reports that are received—there are three and they don't agree. Last time there was an expenditure of \$1,900 which Laurie insists wasn't spent and she can't get any answers.

**4.3 Sandburg's Wish List (Status Report)**—Russell and Rexanne took the wish list around to several big businesses.
